

The Battle of Neighborhoods

Introduction

A businessman wants to open a new restaurant, but he does not know where is the best place. He has information that New York City (EEUU) and Toronto (Canada) are good options to start, but he only has a budget to open only one.

This businessman wants to get better profits reducing cost and receiving many clients.

Problem

Use data to identify the best place where a new restaurant get better profits.

Interest

The businessman who wants to open a new restaurant.

Data

Data sources

Information of Toronto and New York is on Internet. In this case, I collected data from FourSquare, Wikipedia and Coursera.

- https://cocl.us/new_york_dataset
- https://geo.nyu.edu/catalog/nyu_2451_34572
- https://en.wikipedia.org/wiki/List_of_postal_codes_of_Canada:_M

Data cleaning

Steps:

- Data was store in dataframes using pandas library.
- Missing values were dropped.
- To collect information about localization I used FourSquare API.
- Categorical features were transformed to numerical, and then were transformed to One-hot encoding.

Methodology

In this work, I decided to use unsupervised methodology like K-means clustering because I wanted to look for common behaviors in the data.

To work with K-means clustering I use categorical transformation, because it is easier to work with clustering.

New York data:

manhattan_merged.head() # check the last columns!													
	Borough	Neighborhood	Latitude	Longitude	Cluster Labels	1st Most Common Venue	2nd Most Common Venue	3rd Most Common Venue	4th Most Common Venue	5th Most Common Venue	6th Most Common Venue	7th Most Common Venue	8th Most Common Venue
0	Manhattan	Marble Hill	40.876551	-73.910660	1	Sandwich Place	Coffee Shop	Gym	Yoga Studio	Tennis Stadium	Pizza Place	Deli / Bodega	Department Store
1	Manhattan	Chinatown	40.715618	-73.994279	1	Chinese Restaurant	Sandwich Place	Spa	Hotpot Restaurant	Bike Shop	Boutique	Bubble Tea Shop	English Restaurant
2	Manhattan	Washington Heights	40.851903	-73.936900	0	Café	Wine Shop	Park	Deli / Bodega	Tapas Restaurant	Indian Restaurant	Scenic Lookout	Frozen Yogurt Shop

Results

The results show that most common venues in both cities are Coffee Shops. In case of restaurants, there are few of them, but they are more common in New York.

Discussion

There is no any observation.

Conclusion

Showing the results, a better place to open a restaurant is in Toronto, because there less competitors.
